Hurtt Padded Harness

Fluorescent

Hurtt Padded Harness. Designed with ergonomics and safety in mind. The neoprene harness is waterproof, reflective, gentle on your dog's skin and coat and offers a comfortable fit which is balanced to help discourage dogs who want to be on the forehand. Handle on top makes it easy to grab dog when needed. Easy to fit on and to take off making it a true favourite for dog sports!

HURTTA RAINCOAT

The Hurtt philosophy is that outdoor exercise should be fun and natural regardless of weather conditions and time of year. Having the proper apparel widens your opportunities for outdoor activity and allows longer walks while also reducing the need for fur maintenance after walks in the rain.

**HURTTA
LIFE
JACKET**

The buoyancy of this life jacket has been tested by the Finnish Institute of Occupational Health. An adjustable belt and front allow the life jacket to fit most breeds of dog.

Welcome from the President

Well it is time again for our annual shows. We are continuing our tradition of fun and competition.

Welcome to all of our competitors but especially to our foreign visitors, as we understand and appreciate the effort and expense that it takes for you to come to a Bermuda dog show.

The Show Committee has worked very hard to put on a first class show. On behalf of The Bermuda Kennel Club, I would like to thank the Show Committee members for a job well done - with a very special thanks to Carole Havercroft for all of her time and effort.

Again this year, we not only have conformation shows but also obedience and rally events sponsored by the Dog Training Club and IDEA. These clubs have also put in an inordinate amount of effort to be able to offer these trials.

All of the clubs are run by volunteers, and without them none of this would be possible. Thank you all.

Once again, Somersfield Academy has opened their grounds to us so that we can hold our shows and trials. These grounds are perfect for us. On behalf, of the various clubs, I wish to express The Bermuda Kennel Club's sincere thanks.

For the second year, these conformation shows are Crufts qualifiers. The Group Winners, Best Puppy in Show and Best Veteran in Show will qualify for Crufts. Earlier this year three dogs travelled to Crufts, proudly representing Bermuda.

Next year's show will be held in late October. We hope to see you again!

Have a great show and good luck to you all!

Canine Hydrotherapy

...a proven method of effective rehabilitation.

What is Hydrotherapy?

Hydrotherapy is a water based physical therapy for rehabilitation following surgery or injury or long term, chronic, or degenerative problems. The therapy combines exercise in water with a hygienic treadmill.

How does Hydrotherapy work?

Hydrotherapy enables low impact exercise in a controlled environment. The speed, water temperature and depth can be customized to meet each dog's requirement.

Warm water promotes blood flow to the muscles which helps to heal, aids in relaxation and improves pain management.

Water depth allows us to target specific joints in the body.

Buoyancy aids in rehabilitation of weak muscles and painful joints by reducing weight-bearing on joints.

Hydrostatic pressure provides constant pressure to an area or limb for decreasing swelling and improving circulation.

Such request must be made on a transfer of entry form provided by the Bermuda Kennel Club, and must be filed with the Show Superintendent not less than one half hour prior to the start of all judging at the subsequent Show(s) of the series. Should the owner or handler be mistaken in computing the dog's points and the dog compete in Best Of Breed competition before it actually has the required points, any wins at that show(s) will be automatically canceled. No dog may otherwise be transferred to another class.*

Group I: Sporting Breeds

Naturally active and alert, Sporting dogs make likeable, well-rounded companions. Members of the Group include pointers, retrievers, setters and spaniels. Remarkable for their instincts in water and woods, many of these breeds actively continue to participate in hunting and other field activities. Potential owners of Sporting dogs need to realize that most require regular, invigorating exercise.

Group II: Hound Breeds

Most hounds share the common ancestral trait of being used for hunting. Some use acute scenting powers to follow a trail. Others demonstrate a phenomenal gift of stamina as they relentlessly run down quarry. Beyond this, however, generalizations about hounds are hard to come by, since the Group encompasses quite a diverse lot. There are Scottish Deerhounds, Norwegian Elkhounds, Salukis and Beagles, among others. Some hounds share the distinct ability to produce a unique sound known as baying. You'd best sample this sound before you decide to get a hound of your own to be sure it's your cup of tea.

Group III: Working Dogs

Dogs of the Working Group were bred to perform such jobs as guarding property, pulling sleds and performing water rescues. They have been invaluable assets to man throughout the ages. The Doberman Pinscher, Siberian Husky and Great Dane are included in this Group, to name just a few. Quick to learn, these intelligent, capable animals make solid companions. Their considerable dimensions and strength alone, however, make many working dogs unsuitable as pets for average families. And again, by virtue of their size alone, these dogs must be properly trained.

Group IV: Terrier Breeds

People familiar with this Group invariably comment on the distinctive terrier personality. These are feisty, energetic dogs whose sizes range from fairly small, as in the Norfolk, Cairn or West Highland White Terrier, to the grand Airedale Terrier. Terriers typically have little tolerance for other animals, including other dogs. Their ancestors were bred to hunt and kill vermin. Many continue to project the attitude that they're always eager for a spirited argument. Most terriers have wiry coats that require special grooming known as stripping in order to maintain a characteristic appearance. In general, they make engaging pets, but require owners with the determination to match their dogs' lively characters.

Group V: Toy Dogs

The diminutive size and winsome expressions of Toy dogs illustrate the main function of this Group: to embody sheer delight. Don't let their tiny stature fool you, though, many Toys are tough as nails. If you haven't yet experienced the barking of an angry Chihuahua, for example, well, just wait. Toy dogs will always be popular with city dwellers and people without much living space. They make ideal apartment dogs and terrific lap warmers on nippy nights. (Incidentally, small breeds may be found in every Group, not just the Toy Group. We advise everyone to seriously consider getting a small breed, when appropriate, if for no other reason than to minimize some of the problems inherent in canines such as shedding, creating messes and cost of care. And training aside, it's still easier to control a ten-pound dog than it is one ten times that size.)

Group VI: Non-Sporting Breeds

Non-sporting dogs are a diverse group. Here are sturdy animals with as different personalities and appearances as the Chow Chow, Dalmatian, French Bulldog, and Keeshond. Talk about differences in size, coat, and visage! Some, like the Schipperke and Tibetan Spaniel are uncommon sights in the average neighborhood. Others, however, like the Poodle and Lhasa Apso, have quite a large following. The breeds in the Non-Sporting Group are a varied collection in terms of size, coat, personality and overall appearance.

Group VII: Herding Dogs

The Herding Group, created in 1983, is the newest AKC classification; its members were formerly members of the Working Group. All breeds share the fabulous ability to control the movement of other animals. A remarkable example is the low-set Corgi, perhaps one foot tall at the shoulders, that can drive a herd of cows many times its size to pasture by leaping and nipping at their heels. The vast majority of Herding dogs, as household pets, never cross paths with a farm animal. Nevertheless, pure instinct prompts many of these dogs to gently herd their owners, especially the children of the family. In general, these intelligent dogs make excellent companions and respond beautifully to training exercises
